hi Arlene,

please pass my comments on to Robert as I do not have his email address.

The Walton letter to MLA was dated November 15, 2017.

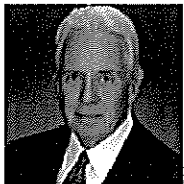

Here are my reactions to the letter:

- Margaret is saying, I am a professional planner, don't question me !!!!  
well its about time,
- Planscape is being paid by the developer, so comments, although some are right, are suspect,
- to confront these planning issues, the MLA has to retain the services of a national / internationally recognized planner to defeat the issues,  
and as soon as possible !  
Margaret is using " first mover advantage ! "
